Amendment to the Claims:

This listing of the claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1-58 (Canceled)

59. (Currently Amended) A feed vaporization and introduction system for a methanol to olefin (MTO) reactor, comprising:

an oxygenate inlet for receiving a methanol feedstock, wherein the inlet includes one or more heating devices for vaporizing the feedstock;

an oxygenate feed introduction nozzle connected by one or more lines to the inlet, the nozzle including a first generally tubular member defining a feedstock pathway, the tubular member having a first end for receiving a feedstock from the one or more heating devices, a second end ~~adjacent a protruding into or flush with an interior surface of the reactor unit~~, and an inner nozzle surface forming a conduit for delivering the feedstock from the first end to the second end, wherein at least a portion of the inner nozzle surface is formed of a commercial alloy resistant to the formation of metal catalyzed side reaction byproducts, which alloy is selected from the group consisting of 754, TD, 758, 602, 690, 276, 263, DS, 302, 803, 864, 410, 304, 316, 400, 330, 800, 600, 825, 601, 625, 617, 956, 693 and 671; and

a second larger diameter cylindrical tube oriented coaxially to the feed introduction nozzle ~~thereby forming to form~~ an outer cooling pathway around the feedstock pathway so that the feedstock can be maintained at a temperature effective to minimize or eliminate the formation of metal catalyzed side reactions, wherein the cooling pathway is closed-off at an end corresponding to the first end of the nozzle so that cooling medium can flow toward the reactor unit and exit the feed introduction nozzle within the reactor unit through a diluent outlet.

60-94. (Canceled)

95. (Previously Presented) The feed vaporization and introduction system of claim 59, wherein the commercial alloy is selected from the group consisting of 825 and 400.

Atty. Docket No. 2002B124/2
Amendment dated November 28, 2006
Reply to final Office Action of August 28, 2006

96-101. (Canceled)

102. (Previously Presented) The feed vaporization and introduction system of claim 59, wherein the commercial alloy is selected from the group consisting of TD, 758, 625, 601 and 276.

103. (Previously Presented) The feed vaporization and introduction system of claim 59, wherein the commercial alloy is selected from the group consisting of 693, 602, 690, 671, 617, 263 and 956.

104-108. (Canceled)
